

Clothespin Memo Clips

It could not be any easier than this! We found our days-of-the-week magnets at the dollar spot in our local craft store! Use a good gripping glue, like **E-6000®**, that will adhere the magnets to the wooden clothespins...the hardest part is letting the glue dry!

For each set of memo clips you will need

one set of days-of-the-week magnets*
7 wooden spring-type clothespins
E-6000® craft glue, *or similar glue***

If necessary, separate each the day of the week from the master sheet. Using **E-6000®** glue, or similar, adhere days-of-the-week magnets to flat side of wooden clothespin as shown, one day for each clothespin. Take care not to get glue into the metal spring of the clothespin. Allow to completely dry.

** if you are unable to find a substitute for the days-of-the-week magnets, download clip art, or use an old calendar with the days marked. Cut out the days of the week and affix to cardboard, trimming as needed and proceed as above.*

**** E-6000®** is made by Eclectic Products, Inc. Visit www.E-6000.com for more information.
