

## *Halloween Party 'Eye' Picks*

Who is watching who this Halloween! Your party guests will be sure to feel the stare of a million eyes with these clever little peeper-picks! We found our "eyeball" beads at the craft store, hanging on a string, glaring us in the face.

### *To make the picks you will need*

small beads that resemble eyeballs  
round wooden toothpicks, *1 for each bead*

tacky-type craft glue, paper towels (*for wiping*), nail clippers

Dip the end of each wooden toothpick into a small amount of tacky craft glue. Place a bead onto the glue covered end of the toothpick. Push the bead down as far as it will go on the toothpick. Wipe off excess glue with paper towel. Allow glue to dry thoroughly. Snip the protruding end of the toothpick, even with the bead, with nail clippers.

Use as serving picks for hors d'oeuvres, cocktails, sandwiches, and anywhere else you like; advise your guests that these picks are not to be eaten!
